

## Master of Urban Design Double Graduate Degree Program

A double degree requires fulfillment of the requirements for two graduate majors for which two differently named master's degrees and two diplomas are granted at the same time. For double degrees, the final project (thesis or creative component) must integrate subject areas from both departments.

Only one committee appointment form and one program of study form need to be submitted for the two degrees.

The proposal will be reviewed by the departments' curriculum committee, by the related college curriculum committees, by the Graduate Curriculum and Catalog Committee, by the Graduate Council, by the Graduate College, and by the Dean of the Graduate College.

### The Proposal for Double Degree Programs

The proposal for double degree programs should include the following information:

1. Name of the programs or majors

Master of Urban Design and Master of Architecture Double Graduate Degree

Master of Urban Design and Master of Community and Regional Planning Double Graduate Degree

Master of Urban Design and Master of Landscape Architecture Double Graduate Degree

2. Name of the degrees

M Arch/M.U.D., M CRP/M.U.D., and M L A/M.U.D.

3. Name of the department(s) which administer(s) the program(s)

The College of Design "Interdisciplinary Programs" administers the M.U.D. program. As an interdisciplinary degree, the Master of Urban Design is part of the College of Design "Design Studies." The program director reports to the College of Design Associate Dean for Academic Programs and is supported by an administrative assistant and other staff members of the College of Design administrative service office. The Department of Architecture administers the Master of Architecture program, the Department of Community and Regional Planning administers the Master of Community and Regional Planning program, and the Department of Landscape Architecture administers the Master of Landscape Architecture program.

4. Rationale for the double degree program

Urban Design is a sub-specialty in the professional fields of Architecture, Planning and Landscape Architecture. The Master of Urban Design is a post-professional degree that builds on the professional knowledge and training students acquire in the M Arch, M CRP and MLA respectively. Graduates of the M Arch, M CRP and M LA programs may develop careers in urban design in professional firms. Accordingly, pursuing both degrees prepares the students to be more competitive in the job market as well as acquire an interdisciplinary sub-specialty in their own disciplines. Since the initiation of the MUD degree in summer 2014, ten College of Design graduate students have requested to pursue a concurrent degree with MUD distributed as follows: 1 MS in Arch, 4 M Arch, 3 M CRP and 2 M LA.

5. Admission procedures and requirements

Students may apply to one of the double degrees before they join Iowa State or after being enrolled in any of the four programs. In either case students need to fulfill the admission requirements of both degrees (as published on the graduate college website), and their application will be reviewed by both programs admission committees for approval.

6. Requirements of the program

Requirements for the M Arch/MUD are 106 credits that cover all the core courses of both degrees in addition to 6 credits of electives (see M Arch/MUD schedule of courses attached).

## Master of Urban Design Double Graduate Degree Program

Requirements for the M CRP/MUD are 61 credits that cover all the core courses of both degrees in addition to 6 credits of electives (see M CRP/MUD schedule of courses attached).

Requirements for the M LA/MUD are 91 credits that cover all the required core of both degrees in addition to 9 credits of electives (see M LA/MUD schedule of courses attached).

7. Expected enrollment

Four to ten students every year.

8. Attached memos showing approval by appropriate department and college committees, faculty, and administrators.

Approved at the College of design AAC meeting on October 20, 2015, 8-0

9. Name(s) of the proposal contact(s)

To Whom It May Concern:

As Chair of the Academic Affairs Committee in the College of Design, I confirm that the committee supports the following dual-degree programs as recorded in the vote of 8-0 at the October 20, 2015 College of Design AAC meeting.

- Master of Design in Sustainable Environments and Master of Architecture Double Graduate Degree
- Master of Design in Sustainable Environments and Master of Community and Regional Planning Double Graduate Degree
- Master of Design in Sustainable Environments and Master of Fine Arts in Integrated Visual Arts Double Graduate Degree
- Master of Design in Sustainable Environments and Master of Landscape Architecture Double Graduate Degree
- Master of Urban Design and Master of Architecture Double Graduate Degree
- Master of Urban Design and Master of Community and Regional Planning Double Graduate Degree
- Master of Urban Design and Master of Landscape Architecture Double Graduate Degree

Please do not hesitate to contact me if you have any further questions or concerns.

Best Regards,

Carl Rogers, PLA  
Associate Professor, Department of Landscape Architecture

To Whom It May Concern:

I am pleased to confirm my enthusiastic support for our double degree programs, the Master's in Urban Design and the Master's in Sustainable Development. Both degree programs have been popular choices for students in our M.Arch. program, as they extend that curriculum into two areas that are vitally important and increasingly valuable in practice.

Our international students have been particularly enthusiastic about these programs, making them important recruitment tools in addition to their academic and intellectual value.

Please do not hesitate to contact me if I can provide further support for these vital degree programs.

Sincerely,

A handwritten signature in black ink, appearing to read 'T. Leslie', written over a horizontal line.

Cameron Campbell  
Associate Dean for Academic Affairs  
College of Design

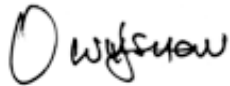

Dear Associate Dean Campbell:

The Community and Regional Planning Department is pleased to support the proposed Masters of Community and Regional Planning (MCRP)/Masters of Urban Design (MUD) and Masters of Community and Regional Planning (MCRP)/Masters of Design in Sustainable Environments (MDesSE) double degrees.

These double degrees would provide our students the opportunity to explore and expand their expertise in urban design and sustainability. The programs have been attractive to many prospective students and will be helpful in our recruitment efforts. We also encourage our students to become proficient in these areas in to diversify their education and increase their job marketability. Indeed, some MCRP students are enrolled in these double degree programs.

If you have any questions or would like further information about our courses, please feel free to contact me.

Sincerely,

Francis Owusu, Ph D.  
Professor and Chair  
Department of Community & Regional Planning

## MEMO

To: whoever it may concern in the Graduate Council and Graduate College

From: Mira Engler, Director of Graduate Education      *M.E.*  
Landscape Architecture Department

This memo is in strong support of the double degree of the masters of Landscape Architecture (MLA) and master of Urban design (MUD). The department of landscape architecture has been actively involved in crafting and promoting this double degree through the past year. We believe that the combined knowledge, skills, and interdisciplinary nature of the Landscape architecture and Urban design programs is of great interest to our students and present an excellent opportunity for our students to become proficient in the sub-specialty of Urban Design as well as more competitive in the job market. The department stands to benefit from collaborative work with faculty in related disciplines as well as potentially from increase in number of applicants interested in both programs.
